:

Summary:

The App Developer position entails creating and maintaining high-quality mobile applications using React Native framework. The role requires strong technical skills and experience in mobile app development, along with the ability to collaborate effectively with cross-functional teams.

Working Conditions:

- Professional office environment in Karachi.
- Standard working hours, Monday to Friday.
- Utilization of computers, printers, scanners, and other office equipment.
- Collaboration with team members and other departments.

Job Duties:
- Develop and maintain mobile applications using React Native.
- Collaborate with cross-functional teams to define, design, and ship new features.
- Ensure the performance, quality, and responsiveness of applications.
- Identify and fix bugs, and maintain code quality.
- Stay updated with the latest trends and best practices in mobile app development.

Machine to be used:
- Computers
- Printers
- Scanners
- Other office equipment

Hazards:
- Ergonomic Risks: Prolonged sitting leading to musculoskeletal issues
- Eye Strain: Screen time causes discomfort and vision problems.
- Stress: Tight deadlines and complex tasks contributing to anxiety.
- Data Security: Risks of breaches and unauthorized access to financial information.
- Repetitive Tasks: Potential for repetitive strain injuries and decreased motivation.

JOB SPECIFICATIONS:

Qualification & Experience Required:

- Bachelor's degree in Computer Science, Engineering
- or a related field (or equivalent work experience).
- Minimum of 2 years of professional experience in mobile app development using React Native.
- Strong knowledge of JavaScript (ES6+), TypeScript, and React/React Native framework.
- Proficiency in building responsive user interfaces and layouts using CSS and styling libraries (e.g., Styled Components). Experience with state management libraries like Redux or Mobx.
- Familiarity with RESTful APIs and asynchronous programming.
- Solid understanding of mobile app performance optimization techniques.
- Experience with version control systems, preferably Git.
- Knowledge of mobile app deployment processes for both the App Store and Google Play Store.

Training:

Selected candidates will receive comprehensive training for up to 4 weeks to ensure they are equipped with the necessary skills and knowledge to excel in their role as an App Developer.

Skills

Technical Skills:

- Proficiency in mobile app development using React Native.
- Strong knowledge of JavaScript (ES6+), TypeScript, and React/React Native framework.
- Experience in building responsive user interfaces and layouts using CSS and styling libraries (e.g., Styled Components).
- Familiarity with state management libraries like Redux or Mobx.
- Understanding of RESTful APIs and asynchronous programming.
- Solid grasp of mobile app performance optimization techniques.
- Experience with version control systems, preferably Git.
- Knowledge of mobile app deployment processes for both the App Store and Google Play Store.

Human Skills:

- Effective communication: Ability to convey ideas and information clearly and concisely.
- Problem-solving: Capacity to analyze problems, identify solutions, and implement effective resolutions.
- Adaptability: Flexibility to adjust to changing circumstances and environments.
